

Agile Manifesto

We are uncovering better ways of developing software by doing it and helping others do it. Through this work we have come to value:

- **Individuals and interactions** over processes and tools
- **Working software** over comprehensive documentation
- **Customer collaboration** over contract negotiation
- **Responding to change** over following a plan

While there is value in the items on the right, we value the items on the left more.

The 12 Principles of Agile

- 1** Our highest priority is to satisfy the customer through early and continuous delivery of valuable software.
- 2** Welcome changing requirements, even late in development. Agile processes harness change for the customer's competitive advantage.
- 3** Deliver working software frequently, from a couple of weeks to a couple of months, with a preference to the shorter timescale.
- 4** Business people and developers must work together daily throughout the project.
- 5** Build projects around motivated individuals. Give them the environment and support they need, and trust them to get the job done.
- 6** The most efficient and effective method of conveying information to and within a development team is face-to-face conversation.
- 7** Working software is the primary measure of progress.
- 8** Agile processes promote sustainable development. The sponsors, developers, and users should be able to maintain a constant pace indefinitely.
- 9** Continuous attention to technical excellence and good design enhances agility.
- 10** Simplicity – the art of maximizing the amount of work not done – is essential.
- 11** The best architectures, requirements, and designs emerge from self-organizing teams.
- 12** At regular intervals, the team reflects on how to become more effective, then tunes and adjusts its behavior accordingly.
